

#### SUPERIOR, HIGH DESIGN

InSync combines high tech and high design. The first affordable weight-activated chair using Body Balance technology, InSync is easy to use. Just sit down! InSync automatically adjusts to support every user, promoting good health and productivity.

#### SIMPLE, EASY TO USE

InSync synchronizes chair with user, automatically adjusting to user's weight and size. Gone are complicated paddles and knobs – a simple dual-function lever adjusts seat-height and multi-positional lockout. With InSync, users focus on their work, not on how their chairs work.

#### MULTI-FUNCTIONAL FOR ANY SETTING

Body Balance control adjusts to every user and in every application, so InSync works for conference, task, executive, or home office use. Customize for any décor with fifteen knit back color options, upholstered seat, and two frame finishes. InSync is available in fabric, vinyl, and leather.

#### ENVIRONMENTALLY CONSCIOUS

InSync is made of 21% recycled post-industrial material and is 98% recyclable and will be LEED certified.

#### PERFECTION IN FORM AND FUNCTION

InSync epitomizes the functional aesthetic. It was designed from the ground-up, stripping away extraneous parts. What remain are the fundamental components, seamlessly integrated into a super sleek design. Nothing is hidden or disguised.

#### AFFORDABLE INNOVATION

The first affordable counterbalance chair, InSync brings high design down to earth. Several structural innovations improve ergonomics and streamline the design, such as altering the control's geometry, the 3D knit back, and the optional adjustable lumbar.

#### LIFETIME WARRANTY

InSync is backed by Highmark's lifetime warranty. Each component underwent finite element analysis to ensure optimal part design and durability.

#### DESIGNED BY

Francisco Romero of PhiDesign
